

Test Scenarios for **Tic-Tac-Toe**

1. Game board & UI

- Verify that the game board (3×3 grid) loads properly.
- Verify all 9 cells are empty when the game starts.
- Verify reset/new game button is visible and working.

2. Player Input / Marking of Cells

- Verify that a player can mark a cell with their symbol (X or O).
- Verify that once a cell is selected, it cannot be overwritten.

- Verify that turns alternate correctly between Player X and Player O.
- Verify that clicking outside the grid does nothing.

3. Win Conditions

- Verify win condition for all 3 horizontal rows.
- Verify win condition for all 3 vertical columns.
- Verify both diagonal win conditions.
- Verify correct player is shown as the winner.

4. Draw Conditions

- Verify the game results in a draw when all cells are filled with no winning combination.

- Verify the draw message is displayed correctly.

5. Game Control & Reset Button

- Verify the reset button clears all cells.
- Verify the reset button resets player turn to X (or default).
- Verify after reset, a new game starts normally.

6. Error Handling

- Verify that no moves can be made after a win is declared.
- Verify that no moves can be made after a draw.
- Verify that any attempt to click a filled cell does nothing.
- Verify no JavaScript errors appear in the console.

7. Negative Test Scenarios

- Verify the game handles rapid clicking properly.
- Verify the game does not allow both players to play at the same time.
